

# PREMIUM WOOD SCREWS

## INCREASED ASSEMBLY SPEED

**Fine-tipped screw** coated with non-greasy wax to prevent splitting of wood

**Type 17 point**  
No pre-drilling required for increased installation speed

**#2 Square Drive** on all screw sizes

PWR DRIVE PREMIUM wood screws are designed for durability, strength and smooth performance. They feature a self-tapping, hi-low thread that provides improved and faster installation. With their flat head and countersinking nibs, the screws provide a flush finish.

## BENEFITS

- Flat head with nibs (screw length 1" and over)
- Easy self-drilling thanks to the type 17 point
- High-quality zinc coating provides extended corrosion resistance
- Coarse 2/3 thread for superior holding power (screw length 1" and over)
- Features a non-greasy wax coating, which reduces friction

## APPLICATIONS

Suitable for all types of wood, plywood, and particleboard
